Maximum	2 marks

Solution Architecture:

The solution architecture for our food delivery app is designed to optimize the entire food ordering and delivery process, providing an efficient and user-friendly experience. It leverages advanced technology to enhance every aspect of the app, benefiting both customers and partner restaurants.

Our solution harnesses a technology to enhance the food delivery process efficiently and effectively.

Here's a concise description of Solution Leveraging Technology for Food Delivery:

- User-Friendly Interface
- Backend Services
- Mobile App Frontend
- Restaurant Partners
- Data Analytics
- Workflow
- Data Flow
- Scalability
- Security
